OBITUARY

Carl W. Hudson Sr.

Carl Hudson Sr. was born July 6, 1939 in Electra, TX. He died March 29, 2019 in Cottonwood, after a long battle with cancer. He was the last of eight children of Ernest and Emma Hudson.

Carl was preceded in death by his parents; brothers, Russell, Ronald, Valton, Hugh and Cloyce; twin sisters, Geraldine and Madeleine; and, his son, William.

He is survived by his wife, Velma; children, Carl "Shorty" Jr (Kelly) of Boerne, TX, Thomas (Becky) of Dewey, and Veanna (Ty) of Page Springs; six grandchildren, Alayna and Matthew of Boerne; Brook and Ethan of Page Springs, and Trena and Jesse of Dewey; sisters-in-law, Mary Lou Hudson, Earla Hudson, Janet Huber, and, many nieces and nephews.

He joined the Navy in 1957, served his entire tour on the USS Midway. After the Navy, he worked for Chevron, Bethlehem Steel and in the Oil Field in Texas before ending up in San Manuel, living with his brother, Valton and his family. Here, he worked for 34 years for Magma/BHP, where he started as a car loader; later becoming a supervisor in mechanical department underground.

His brother, Val and future brothers-in-law, Jack Huber and Vic Clark all worked together and introduced him to Velma Clark of Tucson. They eloped and were married in Las Vegas Nov. 10, 1965. They were married for 53 years. He and Velma left San Manuel in 2005 to live in Pine (where they had a cabin) for 25 years. They enjoyed living there full time, enjoying the mountains, snow and the elk that roamed the property. Health issues forced them to move to Cottonwood in 2012 to be closer to their children.

Carl was a friendly guy who loved people and couldn't go anywhere without seeing someone he knew or have just made a new friend. He liked to make furniture. He started with crib beds that he made for his daughter and, later, grandkids. He made end tables, coffee tables and TV units. He made many beds, mostly western design.

Services for Mr. Hudson will be held at the Community Presbyterian Church, 801 S. McNab Pkwy. in San Manuel on Saturday, April 6, at 11 a.m. In lieu of flowers, donations can be made to St. Jude Hospital.

Pinal County to suspend issuance of open burn permits starting in April

FLORENCE, AZ –Starting April 2, Pinal County Air Quality begin issuing only three-day open burning permits. All permits will expire May 1 and Pinal County will suspend the issuance of all open burning permits on April 27.

Burn permits allow for the disposal of plant material by open burning during limited daytime hours.

Additionally, State law prohibits open burning in Area A from May 1 thru Sept. 30. The Pinal County portion of Area A includes Apache Junction, Queen Creek, Gold Canyon, San Tan Valley and portions of Florence.

The annual cycle of rising temperatures will quickly dry seasonal vegetation, leading to an acute wildfire risk in the desert and upland areas of the County.

The suspension on burn permits will continue until the summer monsoons arrive and mitigate the dual risks to public safety and public health.

Additional information on the Pinal County Air Quality program can be found at www.pinalcountyaz.gov or by calling the Pinal County Air Quality Division at 520-866-6929. It's also advised to check with your local fire department regarding fire conditions.

Mammoth Police Report

According to state law, there are two methods by which police may arrest suspected offenders. The suspect may be physically taken into the department and booked into jail, or the arresting officer may write a citation and release the suspect to appear in court later. All suspects are presumed innocent until proven guilty in a court of law. Only criminal citations are listed. All damages are estimates.

Activity listed March 21-27.

March 23

A vehicle was reported stolen in the 300 block of Hwy. 77.

March 24

Theft was reported at Circle K.

Criminal damage was reported in the 14000 block of Hwy. 77.

Oracle State Park named to top three hiking trails to explore in April

PHOENIX – Spring weather and Arizona State Parks and Trails go hand-in-hand! This is the perfect time of year to lace up your boots, grab your water bottle, and hit the trails.

Because there's an extensive network of trails in the more than 30 parks around the state, we narrowed it down to our top three springtime hikes that are sure to please with views and adventure alike.

1. Red Rock State Park: Head north for cooler weather, later blooming wildflowers, and trails amid the red rocks. Eagle's Nest Trail is 1.53 miles of easy-to-moderate hiking with jaw-dropping views of the Sedona area and the riparian areas of the park.

2. Oracle State Park: April is the perfect time to catch the later-blooming wildflowers at Oracle's higher elevation. The Nature Loop Trail also provides great chances to see wildlife and birds, and is a 1.2-mile loop with amazing views of the Galiuro Mountains and San Pedro River Valley.

3. Buckskin Mountain State Park: Head south from the popular Lake Havasu State Park to this quieter spot along the Colorado River. The Buckskin Trail is a one-mile loop that connects to additional trails if you want to extend your hike. The trail crosses over Interstate 95 and provides an opportunity to check out vegetation and views near the river.

No matter which trail you pick, always make sure to bring plenty of water, wear sunscreen, and dress appropriately, including wearing sturdy, closed-toe shoes.

"Managing and conserving Arizona's natural, cultural and recreational resources for the benefit of the people, both in our parks and through our partners."

For information about all 35 Arizona State Parks and Natural Areas, trails, Off-Highway Vehicle Program, and State Historic Preservation Office, call 1-877-MY-PARKS or visit AZStateParks.com.

Be sure to stop in at the Kannally Ranch House at the Oracle State Park if you head over for a hike at the Park.

HEALTH ISSUES

By Dr. Michael Miles
Special to the Miner

Arthritis is basically inflammation in the joints. Inflammation describes the phenomena when the body sends in "workmen" to repair injury. The "workmen" occupy space. The space being filled then puts pressure on nerve endings strategically placed to detect this influx of fluids. When these nerves are triggered they send a signal that alerts the brain about this activity. The alerting signals are perceived as pain.

So, what we have here is joint pain brought on by various activities in those areas. The more common precipitating causes for arthritis are immune responses (e.g. rheumatoid arthritis and psoriatic arthritis), results from wear and tear (osteo-arthritis, or DJD (degenerative joint disease)), collateral damage (e.g. Lyme's Disease) and toxic overload (e.g. gout, which is an accumulation of uric acid in joints).

There are more than 100 different types of arthritis. It is important to determine the cause of the arthritis in order to develop an appropriate strategy for addressing it. Anti-inflammatories are often the first thought. That is simply because they will bring down the fluid build up that pushes on the nerve endings and triggers the pain signals...in other words, they relieve the pain of arthritis and that is usually appreciated. Common substances that relieve inflammation include ibuprofen and other NSAID (Non-Steroidal Anti-Inflammatory Drugs), as well as steroids.

However, it is wise to first identify the cause because once the pain is gone it is easy to forget about what damage might be occurring. For instance, in the case of osteoarthritis, the cartilage that acts as a buffer could be missing entirely and the joint could be functioning bone-on-bone. In this scenario the joint would continue to deteriorate but without alerting the brain to this activity with pain. It would be similar to driving down the road and noticing that the oil light is on. One solution to addressing this annoying light (or pain) would be to cover it up with a piece of tape. Of course, it would then be more likely that you would forget about it and the engine would burn up.

So, what options are there for addressing arthritis. With toxic overload like gout, one would certainly consider removing or rebalancing the substances that are or have become toxic. This could be as easy as a diet change. Or, perhaps, chelation.

For disease sequelae (collateral damage or side effects), one needs to address the disease. It certainly is appropriate to use anti-inflammatories in these cases once the cause is determined and being addressed. This is true of immune based

ARTHRITIS

inflammation as well. So, with rheumatoid arthritis and psoriatic arthritis the inflammation can be controlled at the same time one tries to control the immune response. I believe it is best to address the immune response with herbs because they do not totally undermine the immune system as would be the case with steroids.

Osteoarthritis is an interesting case. It is understandable that one would like to relieve the pain immediately. However, a polar opposite strategy would be to stimulate the inflammatory response with the intent of repairing the joint biochemically. A method known as prolo-therapy uses this strategy. One would inject substances into the joint that stimulate the body to send in more "workmen" to rebuild cartilage and other tissues. Common substances being used for this purpose include glucosamine sulfate and ozone gas. Recently, physicians have been injecting a person's own "platelet-rich-plasma" back into the joints. These work like stem cells to regenerate cartilage and such.

As you can see there are options for addressing arthritis to be considered before submitting to long term steroid use and surgery.
